Eve Lynch	500002071
Theo Blair	500002351
Jedaiah Harris	500001710
Jemuel Joseph	500002540

### Declaration of Use of AI:

```

209         if (name.isEmpty() || !name.matches(regex: "[a-zA-Z\\s']+$")) {
210             showError(msg: "Name must contain only letters, spaces, or apostrophes.");
211             return;
212         }

```

**Prompt:** “How to use reg expressions in Java to prevent Numeric Values”

We wanted the system to ensure the name feature includes no numeric values. They must be spelt out if needed.

Other items in the code were obtained through research, not AI. For example:

```

48     private DefaultListModel<Item> getInventoryListModel() {
49         JScrollPane scrollPane = (JScrollPane) (JPanel) tabbedPane.getComponentAt(index: 0).getComponent(n: 1);
50         JList<Item> list = (JList<Item>) scrollPane.getViewport().getView();
51         return (DefaultListModel<Item>) list.getModel();
52     }

```
